

TRIMBLE PCS900 PAVING CONTROL SYSTEM.

RUNWAY 3D MILLING AND PAVING.

50% fuel savings over traditional paving methods.

13% faster project completion compared to paving without technology.

Over **\$17,000** in material savings versus initial estimate. Approximately 1% of the total job tonnage.

Zero rework and zero grinds on a 2.4 million square foot paving surface.

Zero waste and zero overruns.

ROI figures illustrate results from an asphalt paving contractor using Trimble PCS900 3D Milling and 3D Paving on a major runway reconstruction project in the United States. For additional information on this project, please visit construction.trimble.com/runwaypaving
