

STORE THE INSPECTION DATA OF ALL ASSETS IN A CENTRALIZED, WEB-BASED DATABASE FOR ACCURATE REPORTING AND DOCUMENTATION

VISUALLY INSPECT ASSETS IN REAL-TIME USING A SMARTPHONE OR TABLET

WIRELESSLY AGGREGATE AND SHARE ASSET CONDITION ACROSS MULTIPLE SITES

## Trimble Inspection Solutions

Visually inspect assets, store inspection data and create reports quickly and easily with Trimble Inspection Solutions. These paperless software solutions take the guesswork out of asset maintenance and put the control in the hands of the equipment manager to increase equipment uptime and decrease costs.

## Inspect Equipment Efficiently with Mobile Apps

### Trimble Inspector

Trimble Inspector is a free mobile app that runs on both Android and iOS smartphones or tablets for daily, weekly and monthly visual inspections using a library of equipment, machine and vehicle types, makes and models, and inspection checklists.

### Trimble Inspector Pro

Trimble Inspector Pro has all the functionality of Trimble Inspector, with the added benefits of customized inspection reports to meet corporate health and safety requirements, and comprehensive maintenance reports for service crews. The additional functionality in Trimble Inspector Pro is accessed with a subscription to Trimble Asset Manager office software.

## Store Asset Inspection Information in a Central Database

### Trimble Asset Manager

Trimble Asset Manager is web-based office software used to integrate, store and report asset condition data collected in the field by Trimble Inspector Pro. All asset information is kept in a secure, central database so managers get the data they need, when they need it.

## Trimble Inspector

- Paperless and easy-to-use software
- Free download from the Google Play store or the Apple App store
- Helps eliminate human error, giving contractors more visibility into machine conditions for safety reasons and preventative maintenance
- Get up and running quickly with minimal training time
- Ensure equipment and maintenance managers have current, documented information for health and safety standards, auditing purposes and preventative maintenance scheduling
- Work without cell or Wi-Fi® connection and upload inspection results once connectivity is enabled.
- Bring your own tablet or smartphone into the Trimble Connected Site® to reduce hardware costs
- Use one system, regardless of equipment manufacturer, for a complete, holistic picture of the entire fleet's visual health

## Trimble Inspector Pro

- All of the features and benefits of Trimble Inspector
- Create unique inspection forms specific to your needs
- Free download from the Google Play store or the Apple App store.
- To enable functionality, a subscription to Trimble Asset Manager must be purchased.

## Trimble Asset Manager

- Get a complete view of all assets on multiple sites, or assets inspected by multiple staff
- A central database stores data collected from mobile devices for analysis and reporting
- See the condition of the entire fleet at a glance
- Filter results for quicker, easier analysis on a site-by-site basis
- Use Connected Community Single Sign On (SSO) to access a variety of applications such as Wireless Data Sync and Internet Base Station Service (IBSS) for simplified operations
- Available as a subscription from your local SITECH technology provider
