Trimble Works Plus Subscription

Drive productivity and profitability with an all-inclusive connected construction solution for a low fixed monthly price.

Optimize your operations: connected construction for a low monthly price

Hidden challenges for technology adopters

- Are you able to track and manage your technology to make the most of it?
- Is your fleet outfitted with a mix of different hardware and software versions?
- What does it cost you to maintain machine control and site positioning systems?
- Do you want to modernize your fleet, but the initial cost is too much?

Be more productive

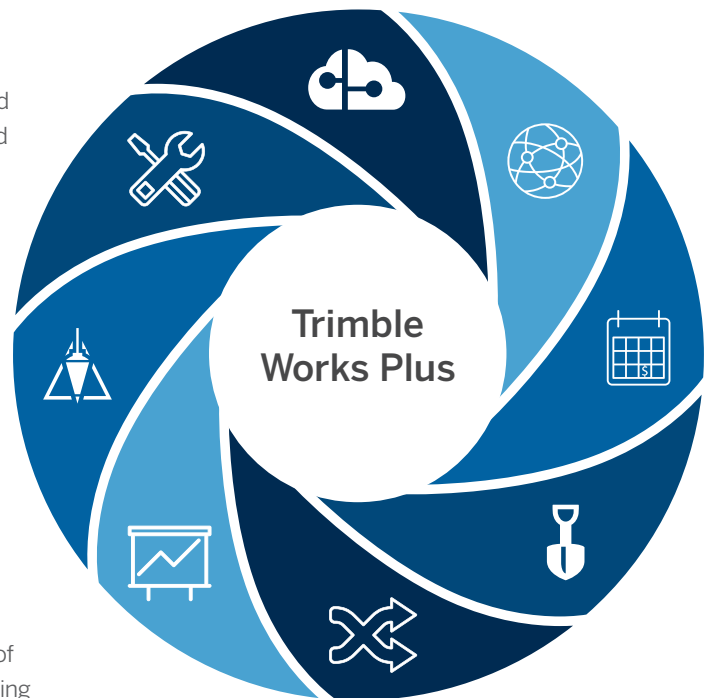

The Trimble® Works Plus Subscription offers you the most up to date Trimble hardware and software. One free hardware upgrade per serialized component and unlimited software updates per subscription term period means worry-free ownership. The Works Plus subscription always keeps you at the forefront of the technology for maximum productivity.

Minimize downtime

Local SITECH® construction technology providers are your boots-on-the-ground support. SITECH keeps you up and running by providing service, support, and replacement units as a part of your subscription. An extended support plan can be purchased for additional support hours and training.

Reduce maintenance and operating costs

With Technology Assurance, unpredictable technology costs are a thing of the past. Accidental damage repair, parts and labor expenses, initial training costs and support fees are all included in your subscription.

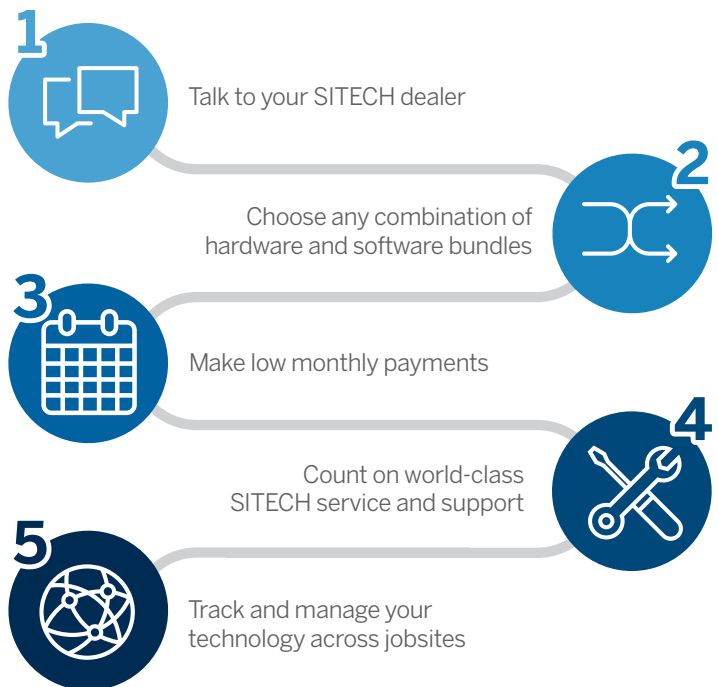

A Trimble Works Plus Subscription is an all-inclusive bundle of machine control, site positioning systems, correction services and office software. The low, fixed monthly price includes installation, upgrades, repairs and SITECH support.

Save time and money managing assets

- Easily track and manage machine control and site positioning system data and technology across project sites
- Keep track of the location of your devices and machines with detailed activity information
- Manage hardware, firmware and software versions efficiently with at-a-glance visibility of firmware versions
- Monitor operations to keep the job on track and keep costs down
- Forget about warranty expirations—your hardware and software are always covered

How it works

Flexible technology solution to fit your business

With a low fixed monthly price and local SITECH installation and support, a Trimble subscription will help you quickly optimize your construction technology program. Upgrade to the latest hardware and software for the duration of your agreement, including a full factory warranty and repair or replacement of accidentally damaged hardware. Based on your needs, choose any combination of bundles:

On Machine

Single Machine Type

Move your grade control system across similar machine types

Flexible Machine Types

Move your grade control system to any machine type in your fleet

Machine Kits

Prepare any machine for grade control at any moment

In-Cab Kits

Grade control system receivers and in-cab display

Off Machine

Base

Trimble base station to create reliable reference data

Data Collector

Rugged controllers for GNSS or total station operations

Data Collector and Rover

Best-in-class Trimble construction survey system

Universal Total Station

Highest degree of accuracy for precision operations

Software

Office

Data prep, design, modeling tools, asset tracking

Add-On Packages

Extended Support Plan

Fixed-price service agreement options for ongoing product support

Augmented Reality (Excavators Only)

View 3D models in the context of existing surroundings

Auto Excavator (Hydraulic Kit)

Automatically control boom and bucket, guiding to 3D models or 2D surfaces

Payload Management

Track bucket-by-bucket payload and monitor mass haul productivity
